

JULY 2025

Credit Industry Snapshot

Executive Summary

TransUnion's July 2025 Credit Industry Snapshot saw serious consumer-level delinquency rates increase across all products. In addition, balance growth increased across products.

The US economy grew at an annualized rate of 3.0% in Q2 2025, rebounding from a 0.5% contraction in Q1. This stronger-than-anticipated performance was largely due to a sharp drop in imports that surged in the prior quarter and weighed heavily on GDP. With fewer imports subtracting from the calculation, the headline number improved, though underlying domestic demand remained modest. Still, the rebound helped stabilize consumer confidence and supported spending.

Labor market conditions, while still positive, showed signs of cooling. July marked the 55th consecutive month of job growth, but the economy only added 73,000 jobs, well below forecasts. The unemployment rate edged up to 4.2%, and revisions to prior months revealed weaker momentum than previously thought. Despite this, wage growth continued to outpace inflation, a trend that has persisted for over the past 18 months. This wage resilience has helped consumers maintain purchasing power, even as job creation slows, and has supported credit performance across products.

The softer jobs report sparked renewed speculation about a potential Federal Reserve rate cut in September, with market expectations rising sharply. However, the Fed's preferred inflation measure – the Personal Consumption Expenditures (PCE) Index – remained elevated at 2.8%, above the central bank's 2% target. This lingering inflation complicates the outlook for monetary policy and could influence borrowing costs for consumers in the months ahead. Credit markets remain sensitive to these shifts, particularly in unsecured lending and revolving credit products.

Meanwhile, consumer sentiment continues to recover, albeit gradually. The University of Michigan's Index of Consumer Sentiment rose to 61.7 in July, its highest level in several months and part of a recent upward trend. Yet, sentiment remains about 7% below its level from a year ago, reflecting persistent concerns about inflation, interest rates and economic uncertainty. This cautious optimism is mirrored in credit behavior as consumers show restraint in new borrowing – even as access to credit remains relatively stable.

Overall:

- Serious delinquency increased across all products
- Average new account balances increased for auto and unsecured personal loan
- Average balances increased for bankcard, mortgage and unsecured personal loan

Auto

- Consumer 30+DPD increased to 4.20% (16 bps); 60+DPD increased to 1.58% (9 bps)
- Average new loan amount financed increased to \$30,389 (from \$30,089)

Bankcard

- Consumer 30+DPD increased to 4.46% (13 bps); 60+DPD increased to 3.09% (9 bps); 90+DPD increased to 2.21% (4 bps)
- Average balance per consumer increased to \$6,492 (from \$6,473)
- Average credit line per consumer increased to \$27,068 (from \$26,986)
- The percentage of consumers with positive AEP on revolving accounts increased to 87.2% (from 86.9%)

Mortgage

- Consumer 30+DPD increased to 2.70% (31 bps); 60+DPD increased to 1.29% (5 bps); 90+DPD increased to 0.81% (4 bps)
- Average balance per account increased to \$232,892 (from \$231,770)

Unsecured Personal Loan (UPL)

- Consumer 60+DPD increased to 3.42% (5 bps)
- Average new account balance increased to \$6,415 (from \$6,356)
- Average balance per consumer increased to \$11,704 (from \$11,676)
- Percentage of UPL consumers with positive AEP decreased to 27.2% (from 29.4%)

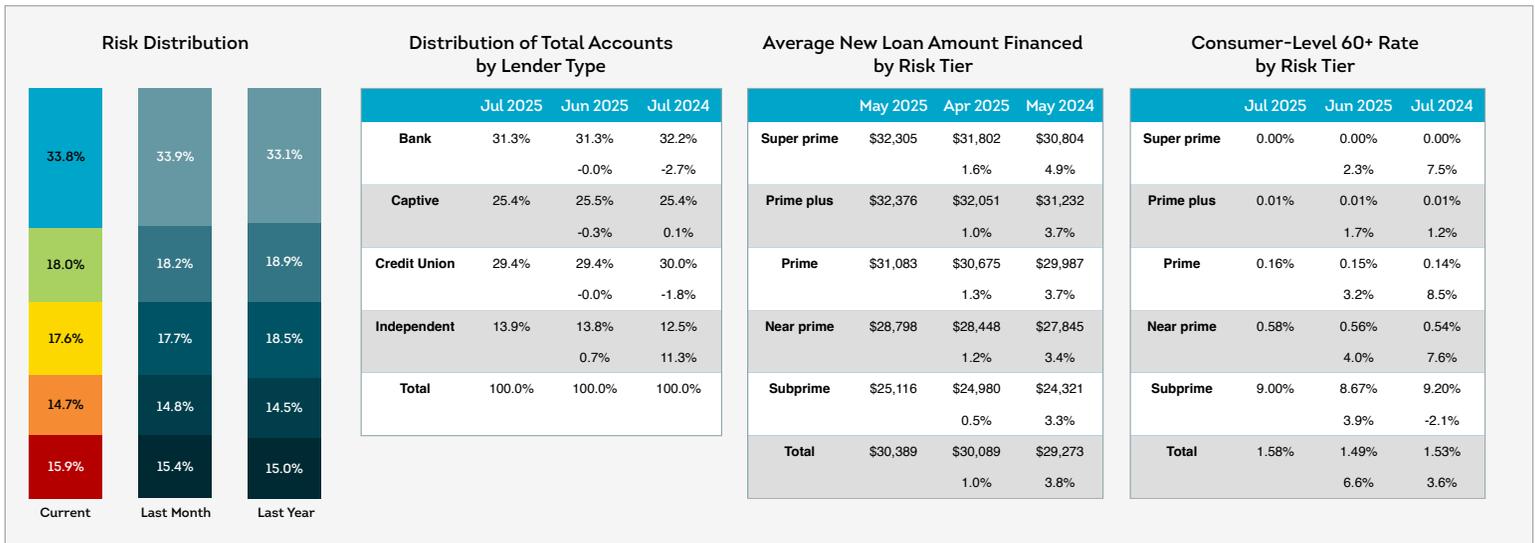

The above data insights are based upon TransUnion research. If you have questions about the Monthly Credit Industry Snapshot report or how to use this information, please contact your TransUnion sales representative.

Note: Mortgage totals from Q1 2024 to present have been updated to include manufactured housing.

Note: For metrics reported in percentage terms (Unemployment, Consumer Price Index, etc.) their month-over-month and year-over-year changes reflect the change in percentage, not the percentage change.

Macroeconomic Indicators and Definitions

All macroeconomic indicators are retrieved from the Federal Reserve Economic Data (FRED) at fred.stlouisfed.org. This data is utilized within the Credit Industry Snapshot to provide a macroeconomic view of recent trends in the industry. The indicators and their definitions are as follows:

Building Permits:

This metric tracks the increase or decrease in requests for building permits.

Consumer Confidence Index:

This metric provides an indication of future developments of households' consumption and saving based upon answers regarding their expected financial situation, sentiment about the general economic situation, unemployment and capability of savings. An indicator above 100 signals a boost in the consumer's confidence toward the future economic situation, as a consequence of which they're less prone to save and more inclined to spend money on major purchases in the next 12 months. Values below 100 indicate a pessimistic attitude toward future developments in the economy, possibly resulting in a tendency to save more and consume less.

Consumer Sentiment Index:

This is a monthly survey of consumers which is used to estimate future spending and saving.

GDP (Quarterly):

The real gross domestic product is the inflation adjusted value of the goods and services produced by labor and property located in the United States.

Hourly Wages:

The average hourly wages for all employees is tracked by this metric.

Housing Starts:

Housing starts occur when excavation begins for the footing or foundation of a building. All housing units in a multifamily building are defined as being started when this excavation begins. Beginning with data for September 1992, estimates of housing starts include units in structures being totally rebuilt on an existing foundation.

Labor Participation Rate:

This metric is an indicator of our economy's active workforce. Its formula is the sum of all workers (employed or actively seeking employment) divided by the total non-institutionalized, civilian, working-age population.

Manufacturing Activity:

As its name implies, this metric tracks manufacturing activity within the US. This metric does not include capital goods related to defense.

New Business Startups (Quarterly):

This metric displays the total of all applications for an Employer Identification Number (EIN). This includes all applications for an EIN, except applications for tax liens, estates, trusts, or certain financial filings, applications outside of 50 states and DC or with no state county geocodes, applications with a NAICS sector code of 11 (agriculture, forestry, fishing and hunting) or 92 (public administration), and applications in certain industries (e.g., private households, civic and social organizations).

Producer Price Index:

This measures the average change over time in the selling prices received by domestic producers of goods and services. PPIs measure price changes from the perspective of the seller. This contrasts with other measures, such as the Consumer Price Index (CPI), which measure price changes from the purchaser's perspective.

Stock Market Volatility:

This indicator measures market expectation of near-term volatility as conveyed by stock index option prices.

Unemployment:

The unemployment rate represents the number of unemployed as a percentage of the labor force. Labor force data are restricted to people 16 years of age and older, who currently reside in 1 of the 50 states or the District of Columbia, who do not reside in institutions (e.g., penal and mental facilities, homes for the aged), and who are not on active duty in the Armed Forces.

Weekly Initial Claims (Four-Week Moving Average):

This metric tracks the number of people who have filed for unemployment during the week. We've adjusted this for the Credit Industry Snapshot to capture a four-week moving average.

Glossary of Terms/Metrics

The following contains the **glossary of terms** for the Credit Industry Snapshot:

Aggregate Excess Payment (AEP):

This is an important metric developed by TransUnion as an additional measure to gauge a consumer's credit strength (beyond credit score). The AEP is utilized to measure how much in additional or 'excess' payments a customer is making beyond their minimum due. For example, a consumer may owe a minimum of \$500/month across their wallet for their credit card, auto, mortgage, etc.

1. If a consumer is actually paying \$700/month toward these bills, their AEP would be +200.
2. If a consumer pays \$500/month, their AEP would be 0.
3. In general, the higher the AEP, the higher the likelihood the customer is in good financial standing and vice versa.

LOB:

This represents 'lines of business.'

Risk Tiers:

System of ranking the overall risk score of individual consumers based upon their credit history. Risk tiers at TransUnion include the following VantageScore® 4.0 categories (listed in order of credit quality):

- Super prime (781-850)
- Prime plus (721-780)
- Prime (661-720)
- Near prime (601-660)
- Subprime (300-600)

The *lowest risk* tier would be super prime, as it has the highest credit score of the group. The *highest risk* tier is subprime, as it reflects the lowest credit score of the group.

The **glossary of metrics** for TransUnion's Credit Industry Snapshot is included as follows:

% of Borrowers 30+:

The percentage of borrowers who are 30+ days past due will be included in this metric.

% of Borrowers 60+:

This metric will track the percentage of borrowers who are 60+ days delinquent.

% of Borrowers 90+:

The percentage of borrowers who are 90+ days delinquent will be tracked by this metric.

Note: This does not include charge-off.

Average Account Balance:

This is the average balance for each account.

Average Balance Per Consumer:

Average total balance per consumer, of consumers with a balance.

Average Credit Line Per Consumer:

Average credit line per consumer, of consumers with a credit line.

Consumer Level 60+ Delinquency Rate:

This metric will include borrowers who are 60 days past due or higher.

Consumer Level 90+ Delinquency Rate:

This metric will include borrowers who are 90 days past due or higher.

Distribution of Delinquency:

This metric tracks the percentage of accounts that fall within each level of delinquency.

Lender Type - Banks:

Loans origination from banks are represented by this lender type.

Lender Type - Captive:

Captive lender types are generally referenced for auto. These lenders are typically located on-site at the dealership.

Lender Type - CU:

This represents 'credit unions' as the lender.

Lender Type - FinTech:

Those lenders employing advanced financial technologies to streamline/update traditional lending processes.

Lender Type - Traditional Finance Companies:

Lenders who do not accept deposits.

Median Account Balance:

This is the median balance for each account.

% of Consumers with Positive AEP:

This metric represents the percentage of consumers who have positive Aggregate Excess Payment (AEP) for a particular product. The AEP is utilized to measure how much additional or 'excess' payments a customer is making beyond their minimum due.

Product - Fannie:

This product type represents the Federal National Mortgage Association (FNMA). This is better known as Fannie Mae.

Product Type - FHA:

This represents the Federal Housing Administration. FHA insures mortgages on single family homes, multifamily properties, residential care facilities and hospitals.

Product Type - Freddie:

This product type represents the Federal Home Loan Mortgage Corporation, better known as Freddie Mac. Operating in the secondary mortgage market, 'Freddie' keeps mortgage capital flowing by purchasing mortgage loans from lenders so they can in turn provide more loans to qualified borrowers.

Product Type - Jumbo:

This product type represents those loans that exceed the dollar amount loan-servicing limits put in place by Freddie Mac and Fannie Mae. Another term of jumbo is non-conforming loans.

Product Type - USDA:

This product type represents non-traditional mortgages, such as zero-down-payment loans for rural and suburban homebuyers.

Product Type - VA:

This product type represents Veterans Administration (VA) loans. The VA loan is a \$0 down mortgage option available to veterans, service members and select military spouses.

Total Accounts by Lender Type:

The total number of accounts held within a particular lender type is tracked by this metric.

Methodology

It's important you have an understanding of how we're producing TransUnion's Credit Industry Snapshot – which is a monthly report summarizing data, trends and insights regarding the consumer lending industry. It draws from TransUnion's extensive consumer credit database which includes over 200 million files profiling nearly every credit-active consumer in the United States. The Snapshot analyzes all open accounts reported to TransUnion and verified within the past 10 years. Accounts not reported as closed with a zero balance (indicated by a closed date, an installment balance of zero, or a remark indicating final status, such as foreclosure or settlement) are included in the metrics.

The Snapshot provides a robust view of all data records (not a sample) on a month-over-month and year-over-year basis. It includes both account-level and consumer-level perspectives on key metrics and trends. Additionally, the Snapshot covers data and trends for the national population overall, with detailed breakdowns by consumer credit score risk tiers and lender segments. The focus is on trends in auto, bankcard, mortgage and unsecured personal lending products.

About TransUnion (NYSE: TRU)

TransUnion is a global information and insights company with over 13,000 associates operating in more than 30 countries. We make trust possible by ensuring each person is reliably represented in the marketplace. We do this with a Tru™ picture of each person: an actionable view of consumers, stewarded with care.

Through our acquisitions and technology investments we have developed innovative solutions that extend beyond our strong foundation in core credit into areas such as marketing, fraud, risk and advanced analytics. As a result, consumers and businesses can transact with confidence and achieve great things. We call this Information for Good® – and it leads to economic opportunity, great experiences and personal empowerment for millions of people around the world.
